APPLY FOR AN EMERGING RESEARCH GRANT

Hearing Health Foundation's Emerging Research Grants (ERG) program provides seed money to researchers with innovative approaches to hearing and balance science.

HHF grants up to \$50,000 per year for each ERG research project for an initial period of one (1) year, renewable for one (1) additional year.

Within the scientific community, the ERG program is known as a competitive process that awards grants to only the most promising investigators. Recipients are exceptionally well positioned to win funding from the National Institutes of Health (NIH), leading to dramatic innovations in the field. **In fact, ERG alumni have gone on to be awarded an average of \$91 for every dollar of their ERG grant.**

While early career researchers are especially encouraged to apply, ERG awards are open to both early career researchers and senior investigators. The application period for the next ERG program opens **Nov. 2, 2020 (deadline: Feb 26, 2021)**.

For more information, please see hhf.org/erg.
